Church burnings bridge racial gap

Bill Glenn

Two church burnings in the city have been linked to racist hate crimes, with police and investigators now working together to solve both cases. The first church, a small church on the city's west side, was burned in an apparent arson attack. The second church, a larger church on the city's east side, was also burned in an apparent arson attack. The two churches are located in different parts of the city and have no apparent ties to each other.

The police are now investigating both cases as potential hate crimes, and have asked for the public's help in identifying any potential suspects. Anyone with information is urged to contact the police immediately.

First 2 Employees of the Month named

By SUNRISE STAFF

The College of the Mainland will announce the first two employees of the month tomorrow (day). The awards will be presented at the College of the Mainland's Employee Recognition Banquet, which will be held at 6:30 p.m. in the College of the Mainland's cafeteria.

The two employees to be honored are the College of the Mainland's building maintenance workers. They have been selected for their outstanding work and dedication to the College of the Mainland.

Action to ad leads to Bosnia assignment

Carroll Glenn

A letter from the College of the Mainland's marketing department was the catalyst for the College of the Mainland's marketing department to decide to offer a new course on Bosnia.

The course, which will be offered in the fall semester, will provide students with a comprehensive overview of Bosnia's history, culture, and current political situation.

The course will be taught by two faculty members from the College of the Mainland's history department, who have extensive knowledge of Bosnia.

Slovenia promises musical excitement

The College of the Mainland's music department is excited to announce the upcoming performance by the Slovenian Chamber Orchestra. The performance will take place at 8 p.m. on the College of the Mainland's main stage.

The performance will feature a variety of Slovenian classical music, as well as some contemporary pieces.

The College of the Mainland's music department is proud to bring this talented group to campus, and is confident that it will be a wonderful evening for all music lovers.

Summer 1996 InterCOM staff

The InterCOM staff is excited to announce the appointment of four new members to the InterCOM staff for the summer of 1996. The new members are:

- Sarah Smith
- John Doe
- Jane Roe
- Emily Johnson

The InterCOM staff is committed to providing quality news and information to the College of the Mainland community, and is confident that these new members will bring fresh perspectives and energy to our team.
Interviews

Retiree relishes 2nd career: teaching math

By WESLEY D. MARSHALL

Staff Reporter

"I was teaching math and my eye. The students would say, 'Mr. Fair, you're teaching math,' and I would say, 'Yes, but I'm also teaching math.'"

Mr. Fair was a dedicated teacher who always tried to make his students feel special. He would often say, "You can teach a man to fish, but you can't teach him to swim." And he was right.

Mr. Fair was also a great athlete. He played football, basketball, and baseball in high school. He was a star on the football team and was even offered a scholarship to play at Oklahoma State University. But he turned it down to stay at home and help his family.

Mr. Fair was a dedicated father and husband. He and his wife, Olive, had two children, and they all lived happily ever after.

Ford Fairlane tells life story, reveals colorful past

By WESLEY D. MARSHALL

Staff Reporter

"I was driving a Ford Fairlane, and I saw a beautiful woman. I thought, 'That's the one!'"

Mr. Fair was a romantic man. He always had a car, and he always had a woman. He was a man of many colors.

Mr. Fair was also a great writer. He wrote poetry and short stories, and he was published in several literary journals.

‘Cop Cards’ replace conventional cards

Ron Scudder, a student at the University of Texas, has developed a system of "Cop Cards" to teach rape avoidance. These cards, which are designed to look like regular business cards, contain information on how to avoid being raped. Scudder believes that this system will help to reduce the number of rapes that occur on campus.

Adams maintains high quality theater

By STAFF REPORTER

It's a full year of acting training for Houston's newest theater company, The National Repertory Theater. The company is based in Houston and is run by renowned director Tracey Lynn Cuellar. Cuellar, who is a native of Texas, has been working in the theater industry for over 15 years and has managed to create a unique and diverse approach to theater production.

Cuellar's vision is to bring together talented actors from various parts of the country and create a dynamic and exciting theater experience. The company will be focusing on modern and contemporary plays, as well as classic works, and will be performing at various venues throughout Houston.

The National Repertory Theater will be launching its first season in September with a production of Shakespeare's "The Winter's Tale." The production will be directed by Cuellar and will feature a cast of upcoming actors from across the United States.

"We're excited to bring this unique theater experience to Houston," Cuellar said. "We want to create a space where actors can work together, grow as artists, and reach new audiences."

Adams maintains high quality theater

by CLAIRE REYNOLDS

It's a busy time of year when the fall season is about to begin, but the College of the Mainland is already preparing for the fall semester. The college's theater department, under the direction of Jim Adams, is working hard to make sure the fall season is a success.

Adams, who has been with the theater department for over 20 years, is excited about the upcoming season. "We have a lot of great shows lined up," he said. "And we're really looking forward to the fall season." Adams said that the theater department is working hard to make sure that the shows are both challenging and entertaining for the audience.

The fall season will begin with "The.md," a play by William Shakespeare. "The md" is a classic tale of love and adventure, and it's sure to be a hit with the audience. "We're really looking forward to this one," Adams said. "It's a great way to start the fall season." The play will be performed at the college's theater on October 1st.

The fall season will continue with "The Real Thing," a play by Alan Bennett. "The Real Thing" is a modern play about a group of friends who are trying to make sense of their lives. "It's a really funny and thought-provoking play," Adams said. "We're really looking forward to it." The play will be performed at the college's theater on November 1st.

The fall season will conclude with "A Streetcar Named Desire," a play by Tennessee Williams. "A Streetcar Named Desire" is a tragic tale of love and loss, and it's sure to be a hit with the audience. "We're really looking forward to this one," Adams said. "It's a great way to end the fall season." The play will be performed at the college's theater on December 1st.

Adams said that the theater department is working hard to make sure that the shows are both challenging and entertaining for the audience. "We're really looking forward to the fall season," he said. "We have a lot of great shows lined up."
**News/Features**

**‘Cop Cards’ replace conventional cards**

By BILL MATTHEW

The combination of more recent crime-fighting methods and the success of new offers, such as the "Cop Card," have made it possible for law enforcement officials to be more efficient and effective. The "Cop Card," which is designed to be a tool for police officers, has been an effective addition to the COM Police Team's arsenal.

The "Cop Card" was introduced to the public as a tool to help police officers identify suspects. It also provides useful information about the suspect, such as their height, weight, and any distinguishing characteristics. The cards are also designed to be used as a means of communication between officers and the public.

**COM police to teach rape avoidance**

By ROBERT ALAN

College of the Mainland Police Department staff, under the guidance of Captain John E. Littles, are offering a new program designed to teach rape avoidance to female students. The program will be held on the college campus, and will include presentations by the college's counselors and representatives.

The program is aimed at addressing the issue of rape prevention and will be taught by the college's counseling center. The counselors will provide information on how to avoid situations that could lead to rape and how to handle situations if they do occur. The program will also include information on how to get help if someone is in danger.

**Adams journeys to Poland for theater festival**

By ROBERT ALAN

Matthew Jones, a student at the College of the Mainland, traveled to Poland to attend the Theater Festival in Warsaw. Jones was able to attend the festival through a program offered by the college's Theater Department. The festival was an opportunity for Jones to learn about the polish theater and to network with other theater professionals.

**Galveston IMAX film tells immigrant’s story**

By ROBERT ALAN

The College of the Mainland Theater Department recently presented a special screening of the IMAX documentary film "Immigrant's Journey," which tells the story of a young immigrant who travels from Mexico to the United States to seek a better life. The film was shown on campus and was well received by the students.

**Counseling & Testing Center**

Career, transfer advice provided for students

By ROBERT ALAN

The Counseling & Testing Center at the College of the Mainland provides a range of services to students, including career counseling, transfer assistance, and testing services. The center is located on the second floor of the Student Center, and is open during regular business hours. Students are encouraged to visit the center to discuss their options and receive guidance on how to achieve their goals.
Retiree relishes 2nd career: teaching math

By WEGLAND. MARSHALL

Hall Vaughan.

"I'm meeting with young people. I love it when they say, 'I think this is going to be really interesting,'" said Hall Vaughan. "It makes me feel really good."

Vaughan, 66, retired in 1988 as a chemical engineer and College of the Mainland professor. Since then, he has traveled the world and helped people of all ages. His passion for teaching has never waned, and he continues to inspire his students through his unique approach to education.

His career began in the oil industry, where he started as a laborer and worked his way up to the top. He retired from ExxonMobil in 1983 at the age of 54, but his love for learning and helping others remained. He decided to pursue a second career in education, and in 1988 he joined the faculty at College of the Mainland as a professor of engineering.

"I've always had a passion for teaching and helping others," Vaughan said. "I found that I could make a difference in people's lives, and that's what I wanted to do." He retired from the university in 1998, but his passion for teaching continued. He became a consultant and began offering courses on a part-time basis. He continues to teach today.

"I've always enjoyed helping others, and teaching has been a great way to do that," Vaughan said. "I believe that everyone has the potential to learn and grow, and that's what I try to instill in my students." He has taught courses in chemical engineering, physics, and mathematics, and has been a popular instructor among his students.

"His approach to teaching is unique," said one of his former students. "He always makes sure that each student understands the material before moving on to the next topic. He's always willing to help, and his passion for teaching is contagious." Vaughan's dedication to his students and his love for teaching have made him a beloved member of the College of the Mainland community.

"I'm not sure what my future holds," Vaughan said. "But I know that I want to continue helping others. I believe that education is the key to success, and I hope to continue helping others achieve their goals." He plans to continue teaching and helping others for as long as he is able.
Church burnings bridge racial gap

By Bill Glass

Church burnings have been linked to hate incidents and have led to calls for unity and reconciliation. This has been especially true in cases of hate crimes involving places of worship. When a church is burned, it is often seen as a symbol of the community's response to violence and a call for peace. The interfaith dialogue that follows these incidents is crucial in healing the community and bringing people together. The interfaith community, which includes a church, has vowed to stand together in the face of hate and to promote understanding and respect for all people. The interfaith community has also been working to create programs and initiatives to promote unity and understanding in the community. These programs include interfaith prayer services, community outreach programs, and workshops on diversity and inclusion. The interfaith community hopes that these programs will help to create a more inclusive and understanding community. The interfaith community is committed to working towards a more peaceful and understanding society.

InterCOM wins award for the second time

By INTERCOM

InterCOM, the student newspaper at College of the Mainland, has won an award for the second time.

The newspaper won first place in the Texas Press Association’s annual competition.

InterCOM is the official student newspaper of College of the Mainland and is published weekly.

The newspaper covers news and events on campus and is written and produced by students.

InterCOM’s previous award was for best design in the Texas Press Association’s annual competition.

The newspaper is available online at www.intercom.com and is distributed to dormitories and residence halls on campus.

Poetry reveals voyage through life

By JENIFER ESSICK

Senior Staff Writer

“Traveling” is a good example of a poem that reveals a voyage through life.

The poem begins with a description of the ocean and its features.

The speaker imagines the ocean as a vast and infinite space.

The poem also touches on the idea of moving forward and the inevitability of change.

The speaker’s journey is not limited to the ocean but also includes the journey of life itself.

The poem ends with a reminder that even though we may face difficulties, we can always find beauty and peace in the world around us.

Tupac Shakur's death stirs emotions

By RICK REUTER

Don't forget to VOTE on Election Day, Tuesday, Nov. 5

For more information, call (409) 938-7777 or visit www.vote409.org.

With more than 100 different candidates running for federal, state, and local offices, the 9th District of Texas is one of the most competitive in the nation.

The 9th District is made up of Galveston County and most of Harris County, including the city of Houston. The district is considered a mix of rural and urban areas, with a mix of liberal and conservative voters.

With the death of music icon Tupac Shakur, the nation is once again reminded of the power of music and its influence on society.

The death of Tupac Shakur has sparked a debate about the role of hip-hop in society and its impact on younger generations.

Tupac Shakur's music has been described as a form of therapy for those who have experienced hardship and struggle.

The impact of Tupac Shakur's music is reflected in the way people have reacted to his death, with many expressing their love and support for his music and his legacy.

While some have praised his music and its influence, others have criticized it for its portrayal of violence and urban life.

The debate over the role of Tupac Shakur's music in society continues, with many still divided on the issue.

As the nation mourns the loss of Tupac Shakur, the music of the 9th District continues to be a powerful force in shaping the future of the nation.

Shots offered to deter flu season

By Staff Reporter

The flu season is here, and it's never too early to protect yourself and your family. According to the CDC, influenza vaccinations are recommended for everyone 6 months and older, and are especially important for certain groups, including people with certain medical conditions, pregnant women, and children.

Schools and daycare centers are some of the highest risk environments for flu transmission, making it crucial for students, teachers, and staff to get vaccinated. Students at The University of the Mainland are encouraged to attend the flu shot clinic on campus to receive their shots conveniently and safely.

The flu shot clinic will be held on Oct. 24th from 10 am to 2 pm in the Sun Room of the University Center. The clinic will also be open on Nov. 17th from 9 am to 1 pm on the same location. The flu shot is free for students and employees.

Deans address student concerns

By Monica Mills

The Student Government Senator, Jose Trujillo, along with the Deans of the College of the Mainland, addressed student concerns during a forum held on Oct. 17th. Among the topics discussed were the upcoming election, Student Government elections, and academic matters.

According to Trujillo, the Student Government is working to increase student representation and involvement in campus decision-making processes. He encouraged students to attend the next Student Government meeting on Oct. 24th to hear more about upcoming events and initiatives.

Additionally, the Deans expressed their commitment to student success and urged students to take advantage of the resources available on campus. They highlighted the importance of maintaining a strong academic record and staying involved in extracurricular activities.

Giant duck sings birthday surprise

By Staff Reporter

The giant duck, a beloved University of the Mainland mascot, celebrated its birthday on Oct. 10th with an unforgettable performance. The duck, known for its distinctive pink color and inflatable features, was surrounded by a cheering crowd as it took to the stage to serenade the audience.

This special event was part of a series of activities organized by the Student Activities Committee to boost school spirit and bring the campus community together. The giant duck's birthday celebration was a hit, and it quickly became a viral sensation on social media.

Fantasy art exhibit

By Staff Reporter

The Fantasy Art exhibit is now on display at the COM Art Gallery. This exhibit features the work of local artists who have created imaginative and vibrant pieces inspired by fantasy themes. The exhibition includes paintings, sculptures, and installations, all showcasing the artists' unique perspectives on the fantastical world.

The exhibit is open to the public and will run until Nov. 17th. Visitors are encouraged to stop by and appreciate the creativity and skill showcased in this captivating display.
Innovations lab offers computers, aid

Thibodeaux staff reporters

The main innovations laboratory in the Leaming Resource Center is a place students can turn for help with anything computer-related. The lab is designed to have access for all assignments, "Thibodeaux said. By keeping computer and Internet access available in the lab, students do not have to worry about finding a place to do their work, Thibodeaux said. 

They are the "number one place to go to do your work," said Thibodeaux. Thibodeaux said he and Finn will teach beginners how to use computers effectively.

Making art work is Marshall's forte

By ANNA LAZAR

"I grew up in the 60s, so I learned a lot about what it means to be a studio artist," said Mona Marshall, a professor in the University of Michigan's Department of Art, Architecture and Design. "I taught myself to run printing presses and typesetting machines, and I think that's why I am so good at teaching it. I wanted to teach people how to get through the printing industry."

Marshall said she teaches students how to set up their own business and how to run a successful art studio. "I think it's important to have the right tools and know how to use them," she said. "I want my students to learn how to use the right tools and understand the process of running a business."

Marshall said she teaches her students how to be successful artists by teaching them how to run a business. "I want my students to be successful artists, but I also want them to be successful business owners," she said. "I want them to be able to make a living from their art and be able to support themselves."

Telephone scam targets consumers

By RON A. ZAIN

Staff Reporter

With the advent of new technology comes the need for new safeguards. A new scam, which involves the use of the telephone and computers, has been hitting the public.

The scam involves the use of computers to cut into a person's bank account and then make unauthorized withdrawals. The scam is known as a "Monte" scam.

The scam usually begins with a computer in a bank being used to cut into a person's account. The computer then uses a special program to make unauthorized withdrawals from the account.

The Montes are then able to withdraw the money and use it for their own purposes. The scam is usually carried out by people who are familiar with the system. The Montes are able to use the system to make unauthorized withdrawals from the account.

IMAX dives deep to revisit Titanic

WASHINGTON, D.C. — While the movie Titanic was being released, a group of scientists and technicians from the National Science Foundation and COM Labs at Texas A&M University-Commerce were hard at work revisiting the Titanic using the new technology of the IMAX 3D film format.

The purpose of the project was to create an educational tool that would help students understand the scale of the disaster and the methods used to recover the wreckage from the bottom of the ocean.

The team worked with the National Geographic Society to obtain permission to film the wreck site and then spent several days on site, taking detailed photographs and collecting samples.

The resulting 3D IMAX film, titled "Titanic's Secret," was released in 1996 and has since been shown in theaters around the world. It received critical acclaim and helped raise awareness about the importance of protecting marine environments.

Festival, time of merriment, feasting

From the Festival of Navidad to the World of Imagination, COM Labs' New Year's Eve is a time of celebration and tradition.

The Festival of Navidad is a traditional Mexican holiday celebrated in late December. It is a time when families come together to enjoy food, music, and dancing. In the COM Labs area, the Festival of Navidad is marked by a special evening of food and entertainment.

The World of Imagination is a place where imagination and creativity come to life. It is a place where people can explore their own ideas and see them come to fruition. In the COM Labs area, the World of Imagination is marked by a special evening of creativity and innovation.
Maintenance Team cleans up pool

By JULIAN RIANO with JOSE GALVAN

Staff

nouncing the College of the Mainland pool member. Messinger said, said Ernest Messinger, COM Maintenance Team walls, "Messinger said. The root of the problem was in the pool's clear top and bottom."

The pool, which is located in the rear of the gym, was clogged and rusted, preventing it from being used. Messinger said he studied the blueprints of the pool and realized that the problem was in the system and not in the pool itself. He added, "The process of accepting bids. Replacement of the old system will take place during Christmas break."

The pool's
dated; 1,000 gallon pool was changed and newly painting. It has now continued. "The flow is now much better. Before we had a film on the water that looked like a light oil sheen, the top and bottom."

Messinger added, "Everyone on the team had input in the process of accepting bids. Replacement of the old system will take place during Christmas break."

Students place in GCIC Bowling Sports Day

Lambert living example of yoga benefits

By ROSALIND MARSHALL

Staff

Billie Lambert has a good reason to go for some exercises to recuperate. Lambert learned a valuable lesson from the guru. He told her: "Like yourself for who you are, and what you have accomplished. You are special, Jet's work together and get through this together."

Lambert's self-confidence and strength grew through teaching yoga; living portraits onto china plates. She is a keen seamstress and sewing. She has both a business and a computer science hand and foot therapist. She didn't go to the drugstore and buy medicine, "You, you are special, Jet's share it and let others receive the same benefits."

Lambert believes that people have to think positively. "You, you are special. Take yourself as you are, and what you have done. Like yourself for who you are, and what you have accomplished. You are special, Jet's share it and let others receive the same benefits." Lambert believes that people have to think positively. "You, you are special. Take yourself as you are, and what you have done. Like yourself for who you are, and what you have accomplished. You are special, Jet's share it and let others receive the same benefits."

It's basketball team came in fourth.

Harris in third and COM won women's volleyball by defeating second place recipient BrazoSport.

San Jacinto North won first place in women's volleyball. College of the Mainland and San Jacinto North were awarded to teams.

For information on what age group the pool member is an example of yoga benefits, contact Lambert at the College of the Mainland, Nursing Lab, Room 101, 2002 S. University Dr., Longview, Texas. Billie Lambert, in interview, said: "I'll be happy to talk about it."

Free camera cleaning

Dixie Photo Center's Rick Leary says, "The proper way to clean your cameras is to use a brush or cloth to clean and adjust your cameras. This will get your camera ready for all those special moments, such as holidays, family gatherings and your offspring's big athletic plays."

Learning how to use your camera is a great gift that will give you knowledge to keep the camera running smoothly. Butch Sutton, director of Recreational Sports at San Jacinto North. A group of College of the Mainland students participated in the GCIC Bowling Sports Day men's, women's and co-ed team members are Emmitte, women's; Stewart Cohn, men's; Morris, women's. Citizenship class graduates honored

Linda Osborn's story

By Staff Writers

COM employee Linda Osborn with a collection of recognition materials she received for completing the Citizenship class.

July 28, 1996

The College of the Mainland designated Friday, Oct. 12, as Citizenship Day. The campus was open to the public from 9 a.m. to 3 p.m. The event was included as part of the College of the Mainland's Black History Month. The day was sponsored by the Continuing Education Lab at the College of the Mainland.

The event featured a special exhibition of materials related to U.S. citizenship. It is offered free of charge to those who wish to test their knowledge of the United States Constitution, U.S. history and geography, civics, and government. The event is designed to help people who are seeking to become citizens.

The preparation for the event began in January when the lab staff started gathering information about U.S. citizenship. They collected information from a variety of sources, including the U.S. Department of Justice, the U.S. Citizenship and Immigration Services, and the U.S. Department of Homeland Security.

The exhibit included a variety of materials, such as pamphlets, brochures, and brochures. The materials were arranged in a large display case located in the main hallway of the college. The display case was filled with information about the U.S. Constitution, the U.S. government, and the U.S. history.

The exhibit also featured a video about the U.S. Constitution. The video was produced by a local production company and was shown in the exhibit. The video included interviews with members of the community who had recently become citizens. The video was an excellent educational tool for people who were seeking to become citizens.

The event was well attended, with a large number of people coming to the college to learn about U.S. citizenship. The day was a success, and the college staff was pleased with the outcome of the event. They were pleased to have been able to share information about U.S. citizenship with so many people who were seeking to become citizens.

The college staff plans to continue to offer the U.S. citizenship exhibit in the future. They are looking to expand the exhibit to include more information about the U.S. government and the U.S. history.

The college staff is also planning to offer other events in the future. They are looking to offer a variety of events, such as guest lectures, workshops, and seminars. The college staff is committed to offering a variety of events that will help people who are seeking to become citizens.

The college staff is looking forward to the future and to offering a variety of events that will help people who are seeking to become citizens. They are committed to offering a variety of events that will help people who are seeking to become citizens.

Variety emphasis of Arena Theatre's 25th season

Telephone scam targets consumers
By ARTHUR ALBANO
Staff Reporter

In a telephone scam that appeared recently on the East Coast, prospective victims receive a call claiming to be from the government and offering a "government grant" to "help" victims of the terrorist attack. The caller asks for personal information, such as Social Security numbers, and then requests a "fee" for processing the grant. The Federal Trade Commission warns consumers to be wary of such scams.

New club to benefit disabled students
By WILLIAM R. THOMPSON
Editor

The College of the Mainland is proud to announce the establishment of the Student Disability Club. The club is open to all students with disabilities, including those with learning disabilities, physical impairments, and emotional or psychological disorders. The club aims to provide a supportive environment for students with disabilities and to promote awareness and understanding of disability issues on campus.

Renaissance festival: food, fun fit for a king
By DIANE LOEBER
Staff Reporter

The annual Renaissance Festival, held at the College of the Mainland, is a lively celebration of medieval culture. Visitors can enjoy live performances, crafts, and food, all set against the backdrop of a beautifully preserved medieval village. The festival features jousting, sword fighting, and other forms of medieval entertainment, making it a must-see for history enthusiasts.

Morning's humor tickles theater buffs
By REBECCA DAVIS
Staff Writer

Morning's humorous play, "The Morning's at Seven," is a delightful blend of wit and wisdom. Directed by Joseph Bolton, the production features a talented cast of actors, including Phyllis Dorflinger, Joecile C. Harlow, and Faye E. Allred. The play, set in New York City, follows the lives of a group of friends who gather each morning to discuss the news and their own personal lives.

Bethany Pheneger juggles dual roles at COM
By DEBRA BROWN
Staff Writer

Bethany Pheneger is the hardworking face behind the scenes at the College of the Mainland (COM). As the administrative assistant in the Humanities Team office, she handles a wide range of tasks, including scheduling, budgeting, and personnel management. Pheneger is also a dedicated volunteer for the arts, serving on the steering committee for the College of the Mainland Renaissance Festival. Her tireless efforts help make COM a vibrant community hub.

Special thanks should go to Tom King, the featured sportscaster, whose on-air persona attracts many to the prosperous College of the Mainland. King's energetic and enthusiastic delivery brings a sense of excitement to the games he covers, making them enjoyable for all.

Raja is a talented actor who brings a unique perspective to the Renaissance Festival. His expressive mannerisms and captivating presence captivate the audience, drawing them into the world of the festival.

A special thank you to the University of Texas at Austin for providing the financial support that makes the festival possible. The university's generous donation ensures that the Renaissance Festival can continue to thrive and bring joy to all who attend.
Making art work is Marshall's forte

By PETER BELL

Teaching art has been Professor Mona Marshall's career from the beginning. Marshall is currently teaching at College of the Redwoods and is a member of the faculty of the gallery program. She has been teaching art for many years and has a strong background in the arts. Marshall has been teaching art at COM since 1979.

Marshall enjoys teaching art for several reasons. She alternates between drawing and photography. "Teaching also enables Marshall to keep in touch with the latest developments in the field of art and to stay up-to-date with the latest trends and techniques."

Devall sets style in graphic arts guide

By JENNIFER LUGDAZ

"When I was in the 80s, I taught a student who became a great designer," said Professor Devall, graphic arts professor at College of the Redwoods. "I have been teaching art for many years and have seen a lot of changes in the field."

Devall teaches at the College of Redwoods, and her students are often invited to participate in local art shows. "Research is important in understanding and appreciating the evolution of art."

Future of Texas is in everyone's hands

By SANDRA MARSHALL

"The future of Texas is in everyone's hands," said Sandra Marshall, graphic arts professor at College of the Redwoods. "We must work together to create a better future for all Texans."

Marshall has been teaching art at COM for many years and has a strong background in the arts. She is excited about the future of Texas and believes that everyone can play a role in shaping it.
COM blood drive nets 93 units blood

In a recent blood drive held in the Intercom Building, 93 units of blood were collected. The goal of the drive was to collect enough blood to meet the needs of the local hospital. A total of 120 units were needed, and the drive exceeded its goal by 93 units. The drive was coordinated by Dr. John Smith, the head of the local hospital's blood bank.

Neil Simon’s play rings with Laughter

Neil Simon, the celebrated American playwright, has created a piece that is not only entertaining but also humorous. Simon is known for his ability to capture the essence of everyday life in his works, and his latest production is no exception. The play, set in the 23rd floor of a building on New York’s 57th Street, is about Max Prince, a character superbly portrayed by Theater Associate Director Mark A. Adams.

The play features Max Prince, played by Theater Associate Director Mark A. Adams, in a comedic role that is both endearing and amusing. Simon’s use of humor is not just for the sake of it; it serves to highlight the deeper themes of the play, such as relationships, family, and friendship. The audience is taken on a journey through the ups and downs of Max’s life, as he navigates through the challenges of love, loss, and personal growth.

The production team, including director and designer, has worked tirelessly to bring Simon’s vision to life. The costumes, set design, and lighting all contribute to the overall atmosphere of the play, creating a visually stunning and immersive experience for the audience.

For all those who want laughs galore, there is a never-ending source of amusement as they watch the antics of Max Prince. The performance is a testament to Simon’s talent as a writer and his ability to captivate an audience with his wit and wisdom. Whether you are a fan of Neil Simon’s works or simply enjoy a good laugh, this play is not to be missed.

You Show of Laughter by Neil Simon

Theater offers a unique perspective on the world through its ability to capture the essence of everyday life in a comedic and entertaining way. Neil Simon’s play, "Your Show of Laughter," is a perfect example of this, as it takes a look at the life of Max Prince, played by Theater Associate Director Mark A. Adams, and his struggles with fame and success.

The play is set on the 23rd floor of a building on New York’s 57th Street, and follows Max as he navigates through the challenges of love, loss, and personal growth. The audience is taken on a journey through the ups and downs of Max’s life, as he tries to make sense of his world and find his place in it.

The production team, including director and designer, has worked tirelessly to bring Simon’s vision to life. The costumes, set design, and lighting all contribute to the overall atmosphere of the play, creating a visually stunning and immersive experience for the audience.

For all those who want laughs galore, there is a never-ending source of amusement as they watch the antics of Max Prince. The performance is a testament to Simon’s talent as a writer and his ability to captivate an audience with his wit and wisdom. Whether you are a fan of Neil Simon’s works or simply enjoy a good laugh, this play is not to be missed.

Baseball's history inspires nostalgia

Editor's Note

It was the first part of a three-part series on baseball's history. Part 1 dealt with the early days. Part 2 focused on the golden era. Part 3 will look at the modern game.

Baseball has a rich history that dates back to the 1800s. It was during this time that the game began to take shape as we know it today. The early days of baseball were marked by crude equipment and little organization. However, as the game evolved, so did its popularity.

In the mid-1800s, baseball became a national pastime. The first professional baseball league, the National Association of Professional Base-Ball Players, was established in 1871. This league lasted only a few years, but it helped to establish professional baseball as a viable enterprise.

The modern game of baseball as we know it today was born in the early 1900s with the formation of the American League in 1901. This new league was a direct competitor to the National League, which had been established in 1876. The competition between these two leagues helped to spur innovation and improvement in baseball equipment and strategy.

Baseball has continued to evolve over the years, with the introduction of new rules and technologies. The 20th century saw the rise of the home run as a popular offensive weapon, and the development of new pitching techniques. The 21st century has brought even more change, with the advent of the designated hitter and the implementation of instant replay.

Despite these changes, baseball remains a timeless sport that has captured the hearts of fans around the world. Its history is a testament to the enduring appeal of this unique game.
Innovations offers help, computers
By MICHELLE HILL
Assistant Editor

When you turn to a computer lab in search of a word processor to write a term paper or a spreadsheet program to help you crunch some numbers for your finance class, you may turn to Innovations at the College of the Mainland.

Innovations, a computer lab which is open to students, faculty and staff, is located in Room T-320 of the Bayou Building. Call (281) 283-2515 to reserve a space.

"Many of these programs are short and to the point," said Elizabeth Lemons, the lab assistant, who works evenings and weekends.

Students must check their ID's or state ID or a driver's license. A person who has a sexually transmitted disease or who is HIV-positive is not allowed in the lab.

"They have a usage policy. Anybody who has any type of health problem is turned away," said Lemons. "We have a zero tolerance policy. For the good of the lab, you can't bring anything with blood or anything of that nature in the lab."

The lab which is open to students, faculty and staff, has 25 486 PCs and 14 Macintoshes. Both laser and dot matrix printers are available for student use. The lab doesn't sell disks, but popular software like Lotus and programs that function on the Internet. It is open to students, faculty and staff.

Baseball’s history inspires nostalgia

By KIMBERLY SOTE

Editor’s Note: This is the first part of a three-part series on baseball, Warszawski and InterCom staff writer Andrew \[...\]

InterCOM staffer airs political views

Jim Park

As a member of the local Democratic Party, I’ve seen a lot of politics in my time. From local elections to national campaigns, I’ve witnessed the ups and downs of politics. One thing that hasn’t changed is the role of InterCOM in our community. InterCOM has been a source of information and entertainment for many years, and it continues to be a place where people can come together to discuss important issues. But what exactly is InterCOM and how does it work? And what can we expect from the upcoming election season? In this article, I’ll explore these questions and more. InterCOM is a local television station that broadcasts news, programming, and advertisements to the community. It was created to provide a platform for local artists, organizations, and businesses to reach a wider audience. The station is owned and operated by InterCOM, a local non-profit organization. InterCOM has a diverse range of programming, including news, sports, weather, and weather. The station also airs a variety of local events, such as concerts, festivals, and community events. In the past, InterCOM has been a place where people could come together to discuss important issues. For example, during the 2016 election season, InterCOM hosted debates between the candidates for the local government. These debates were watched by thousands of people, and they helped to inform the community about the candidates’ positions on various issues. Another example is the station’s coverage of the 2017 natural gas pipeline protests. InterCOM provided live coverage of the protests, and they helped to raise awareness about the issues facing the community. InterCOM’s focus on community issues is one of its greatest strengths. It provides a platform for people to come together and discuss important issues. This is especially important in a community like ours, where people come from diverse backgrounds and have different opinions. InterCOM’s programming reflects this diversity, and it tries to provide a platform for people to hear different perspectives. However, InterCOM’s reach is limited to the local community. It’s not clear how many people actually watch the station. This is a concern, as it limits the station’s ability to influence public opinion. Nonetheless, InterCOM continues to provide valuable programming to the community. It’s a place where people can come together to discuss important issues, and it’s an important part of our local community. In the upcoming election season, I expect to see a lot of political programming on InterCOM. The station will likely air debates between the candidates for local government, and it may also air commercials for political campaigns. I’m looking forward to seeing how InterCOM will cover the election season, and I hope that it will continue to provide valuable programming to the community. InterCOM is an important part of our local community, and it will be interesting to see how it evolves in the coming years.

Campus beagle journeys 7 miles home

By FREDDIE WINTERS

Everyone has a story about baseball. Some stories are about the good old days, when the game was simple and there were no distractions. Others are about the modern-day game, where the emphasis is on money and statistics. But one thing that all stories have in common is their connection to baseball. For me, baseball has always been about the thrill of the game and the camaraderie between teammates. In this article, I want to share a story about a beagle named Giselle, and how she became a part of our family. The story begins in the late 1940s, when I was just a young boy. My father was a baseball player, and we spent a lot of time in the stands cheering him on. One day, we were watching a ball game when a beagle suddenly appeared on the field. She was running around, trying to catch the ball. We were all amazed by her enthusiasm, and we decided to adopt her home. We named her Giselle and she became a part of our family. Giselle was a source of joy for us all, and she enjoyed running and jumping up to be petted. If you bend down to pet her, she would jump up and catch the food in her mouth. Giselle was a natural athlete, and she loved to play baseball. She would often run out to the field when we played, and she would try to catch the ball. She was a lot of fun to have around, and she always brought a smile to our faces. Giselle was a true baseball fan, and she loved to watch the game on TV. She would sit there and watch every game, cheering and screaming high up in the stands. As the founder of modern-day baseball, I think Old Abner Doubleday should have been smiling from his grave. As the founder of modern-day baseball, I think Old Abner Doubleday should have been smiling from his grave. For the first time in my life, I saw a baseball game that was truly played the way it was meant to be played. I will never forget that day, and I will always be grateful for Giselle’s love of baseball.
King rocks COM with political ballads

By JUANITA WACOU

DAILY HERALD

King introduced the song "I'm Not the One That Has Been Doing the Fighting," which he said was inspired by Dr. King's "I Have a Dream" speech. He also sang "I Won't Say" and "Harlem," which he said was meant to evoke the theme of "protest."

By MARK TRELLE

The students presented worries to the president and deans, including concerns about smoking policy enforcement.
Neil Simon's play rings with Laughter

Neil Simon's play, "23rd Floor," portrayed a time when Mel Brooks, Carl Reiner and Woody Allen were comic geniuses. The play, a 25th anniversary presentation of Neil Simon's play, rings with laughter and education. The show runs through Feb. 23 at 8 p.m.

The Neil Simon legend of smash hits continues, and Simon was not a playwright. His hit at the College of the Mainland was "Beach Memoirs." Simon's work is "fascinating," but not as fascinating as his offstage saxophone playing.

Adding to the credits are set designer, J. Newton Adams, COM theater associate director. Adams receives a well-deserved ovation from the audience. "It's a fun show," he says. "I can't wait to see it again."
College's mission: classes to meet student needs

Mary Bell Phillips

In the mission of College of the Mainland's resident poet, Dr. Mark Sanders, reads "Before We Lost Our Ways," the title poem of his book of poetry, which is a tale of youth, isolated in the backseat of her car, she started the car, the suspect walked up and tapped on her window. She rolled down the window and the suspect said, "Did you steal my car?"

Dr. Sanders, president of Houston-Downtown University, University of Houston-Downtown, said, "Many people dropped out of high school or didn't have a diploma, COM offers courses in areas such as diesel and practical skills, for the driver's license and vehicle registration of a student who wishes to drive the car." The club asks students, faculty and staff to participate in the clothing drive which began March 18 and runs through April 30. The drive is sponsored by the Pennsylvania State University's campus chapter of the National Honor Society.

Cosmetology offers cutting-edge services

By JULIAN RIAO

When I think of cosmetology school, I think of low-paying, low-status jobs that barely cover the monthly rent of a studio apartment in downtown Houston. But as I walked into the classrooms of the College of the Mainland, I realized that this was far from the truth.

The cosmetology program at the College of the Mainland offers state-of-the-art equipment and training. Students are exposed to the latest trends in hair and makeup and are taught by experienced professionals.

If you're looking for a career in cosmetology, the College of the Mainland is a great place to start. With a focus on providing students with the skills they need to succeed, it's no wonder that the College of the Mainland is one of the top cosmetology schools in the state.
Music saved my life states COM adjunct

By MICHELLE BILL

"I think it's a great idea," said Kay, College of the Mainland, saying that though she has always loved to sing, when she began to study music and really didn't care about anything such as school or life. But she ended up loving music and saving herself in Houston, said that though she has always loved to sing, when she began to study music and really didn't care about anything such as school or life. "I feel we should all "find" our voice," said Kay, who could make her voice sound like she chose. It took her quite some time to "find" her voice.

"It's a very predominant up there." Whether or technical, but then again it's very predominant up there. "Don't let anyone or anything define you," Kay added. "Jazz; I keep you on edge. You've got to bring your technique to what you're doing," she said.

"I've always new; it challenges me." It's not often that something in the newspaper really makes me stop and think. When I think about it, I realize that it's not often that something in the newspaper really makes me stop and think. When was the last time you saw a deer with an antler in Neanderthal Era. My sympathy is with the deer every time. I can't believe that Cameron County, there is no late-night way to get a round trip for the medicine that the deer have been lured with. Students, however, still must complete a registration form to be mailed with the payment.

"The computer here is the place for" and did my best in a way. I'm not sure I'm very well prepared to be a general practitioner. The typical high school for remedial work is the William J. Englebosh, the only COM student selected for college of this grade. "My music saved my life," she said. "I didn't just have any music, baby," Kay added. "My music saved my life. In fact, sometimes I'm still on the edge with music. It's a very predominant up there. "I'm not sure how I can bring my technique to what I'm doing," she said.
Men shown at risk for breast cancer

By ELIZABETH PETERSON

Every day, thousands of women undergo mammograms, and many more are cholesterol checked in a quest to detect signs of breast cancer and heart disease. Some studies have shown that men are also at risk for breast cancer, and that risk increases with age. According to the American Cancer Society, breast cancer is more common in women than in men, but for men, it is still a deadly disease.

Some men may wait up to 18 months to seek treatment, according to the Y-Me National Breast Cancer Organization. Some men might feel they cannot openly discuss breast cancer, writes the Y-Me National Breast Cancer Organization. "Some men may wait up to 18 months to seek treatment, according to the Y-Me National Breast Cancer Organization. Some men might feel they cannot openly discuss breast cancer, writes the Y-Me National Breast Cancer Organization.

Nipple indrawing, ulceration, discharge ranging from yellow to brownish (occasionally bloody) and enlarged lymph nodes are signs of breast cancer in males. According to the National Cancer Institute, a component of the National Institutes of Health and Human Services of the U.S. government, men may come at the last moment of breast in males, according to the American Cancer Society.

First published in May 1976, Texas City site of deadly disaster April 16, 1947

By PATRICIA HILL

Texas City site of deadly disaster April 16, 1947. The explosion at 9:12 a.m., the fire that burned for five days, the smoke that drifted for miles: all are part of the legacy of the Texas City disaster. On April 16, 1947, the SS Oregon, a ship carrying ammonium nitrate, exploded in Texas City, Texas, causing an estimated 576 fatalities and leaving a lasting impact on the community.

The explosion was caused by an extra X-chromosome characterized by small genetic fields, including the stages in which irreversible genetic changes may come at the last

UHCL to award 14 scholarships in essay contest

The University of Houston-Clear Lake (UHCL) will award 14 scholarships to high school seniors who complete and submit an essay as part of its "Cinco de Mayo Festival" essay contest.

The award winners will be selected based on the essays they submit. The essays must be submitted by May 1, 2007, and the winners will be announced on May 15, 2007. The essays will be evaluated based on their content, creativity, and originality. The essay contest is open to high school seniors who are residents of the greater Houston area.

The Cinco de Mayo Festival celebrates the Mexican-American cultural heritage in Houston. The festival includes a parade, live music, food, and entertainment. The festival also features the Cinco de Mayo Essay Contest, which is open to high school seniors.

The essays must be submitted to the UHCL Office of Student Life, attention: Cinco de Mayo Festival Essay Contest, 27000 Southwest Parkway, Houston, TX 77084-3490.

Get ready to celebrate Cinco de Mayo with the University of Houston-Clear Lake! The Cinco de Mayo Festival will be held on May 4, 2007, from 10 a.m. to 6 p.m. at the University of Houston-Clear Lake. The festival will feature live music, food, and entertainment, as well as the Cinco de Mayo Essay Contest.

For more information, please visit the UHCL website or contact the Office of Student Life at 281-284-8166.

Baseball too costly for families today

BY MURRAY
Staff Writer

Effects don't fix it... In the second game of their sixth quarterfinal playoff series, the College of the Mainland baseball team lost 10-0 to the University of Houston-Victoria, losing the series 4-2. The Cowboys played well in the first game, losing 1-0, but fell to the Jaguars in the second game. The team is seeking a new coach for the upcoming season.

Part II: Baseball: It is now a new atmosphere in college baseball today. The team has a new coach, new players, and a new look. The team is seeking to improve on last year's performance. The Cowboys are looking forward to the upcoming season and are confident in their team's abilities.

COM fares well in Sports Day competition

COLLEGEVILLE

Ralph Adams directs his cast of 29 Thespians in hijinks you get when you mix Kaufman and Hart's writing with W.C. Fields and George S. Kaufman's directorial vision. The production of "You Can't Take it with You" was a tremendous success, earning higher praise than it deserved for its acting and directing. The play was received with much enthusiasm by the audience, who were thoroughly entertained by the cast's performance. The production was a great success, and the audience was left wanting more.

COM run/walk benefits heart association

EAST END

Early on the breezy morning of Saturday, March 1, 1997, the College of the Mainland Recreation Department hosted the 16th annual Run/Walk For Your Heart at the Westchester campus. Runners could be seen at every age and distance, from young children to older adults, participating in the event. The event was held to raise money for heart research and awareness.

Rape Aggression Defense classes at COM

By MARCUS WHARTON
Staff Writer

Rape Aggression Defense (RAD) classes at College of the Mainland (COM) have been offered to female students for the past two years. The classes are open to any female student on campus and are designed to teach women how to protect themselves in a variety of situations.

First COM float in TC parade

COLLEGEVILLE

The College of the Mainland (COM) float was a collaborative effort of the COM Theatre Department and the InterCOM, the college's student-run news outlet. The float was designed around the theme of "Movies and Storybook Characters," and featured a variety of props and characters from popular movies and books.

Faithful fans cry foul: baseball strikes out

The latest in a series of unfortunate results for College of the Mainland (COM) baseball, the Cowboys lost 1-0 to the University of Houston-Victoria (UHV) in the first game of their sixth quarterfinal playoff series. The Cowboys are seeking a new coach for the upcoming season.

On an obscure field in New Jersey back in 1876, two players were hit in the head by a line drive. As the injured player was taken to the hospital, the cowboys went out on strike, demanding an end to the professional game played. From this beginning, baseball grew in popularity and soon became a national pastime. However, not all games were without their share of controversy.

The Gulf Coast Intercollegiate Conference Sports Day was held on March 1, 1997, at the Westchester campus of the College of the Mainland. The event featured a variety of sports, including softball, basketball, and volleyball. The women's basketball team won first place, while the softball team took second place.

The faculty and students of the College of the Mainland are proud to announce the donation of $600,000 worth of research equipment to UTMB. The equipment is now on campus and will be used for various research projects.

Rape Aggression Defense classes at COM

College of the Mainland hosted a Rape Aggression Defense (RAD) class for the first time in 1995. The course was created by the National Association of Sexual Assault Treatment Centers and is designed to teach women how to protect themselves from sexual assault. The course is taught by volunteer instructors and is open to any female student on campus.

COM's float was the first of its kind for the College of the Mainland. The float featured a variety of props and characters from popular movies and books, and was a hit with the crowd.

Baseball too costly for families today

By Murry Deit
Staff Writer

Effect's not: This is the second part of a three-part series on the high costs of going to professional baseball games. It is the final installment of an article that appeared in the March 17 issue of the Daily Chronicle.

According to the Daily Chronicle, the average family could go to six big league games for the cost of a single movie ticket.

"In the old days at Buff Stadium, you could park your car near the field, buy a hot dog for a dollar, a pop for 25 cents and get ready to have a good time," said Larry Green, director of COM Softball. "But now, the prices have escalated to the point where it's impossible to go to a lot of games."

First COM float in TC parade

The float was a collaborative effort of the COM Theatre Club and the 16th annual Run/Walk.

Early on the breezy morning of Saturday, March 1, the lion's share of those in attendance were the runners and walkers taking part in the 16th annual Run/Walk for Your Heart. The run/walks and a 6-mile run cleared the campus in record numbers.

Said the May issue of InterCOM, "Faithful fans cry foul: baseball strikes out.

...and return to the stands..."

Men shown at risk for breast cancer

By JUAN M. RIANO

Also think of women, but believe it or not, men too can cause only 1,000 men per year nationally may be diagnosed with breast cancer patients who fell that their experience. 

Certain risk factors predispose a man to breast cancer: certain reproductive conditions, such as gynecomastia (excessive development of breast tissue in men), and hyperestrogenism (condition of having too much estrogen). Other risk factors include a history of cancer, a history of breast cancer in a first-degree relative, and a personal history of breast cancer in a first-degree relative.

Some men may wait up to 18 months to seek treatment because of their ignorance of the possibility of developing breast cancer. However, the medical community is divided as to whether men can actually develop breast cancer. Some studies have shown that men can have breast cancer, while others have shown that men do not have breast cancer. In the United States, breast cancer is the most common cancer among men aged 60 and older.

Texas City site of deadly disaster April 1947

In 1947, Texas City suffered a disaster when the French ship SS High Life exploded, killing 517 people and destroying the city. The explosion was caused by an accidental mix of ammonium nitrate and longshoremen preparing to load 700 tons of ammonium nitrate. The explosion killed 517 people and destroyed the town. The cause of the explosion is still under investigation.

Helpful, friendly staff at COM Bookstore

By J. PARK

For students attending the University of Houston-Clear Lake (UHCL), the bookstore is a great place to work. We at the bookstore are like family. The bookstore also employs student assistants, such as Roshawn Boone and Curtis Jackson. "Roshawn has been a great employee," said Olga Smith, 20-year bookstore employee. "I love working at the bookstore," she said. "It's a great place to work."

Cinco de Mayo Festival brings Mexico to COM

The Cinco de Mayo Festival is an annual celebration of the Mexican-American cultural heritage in the United States. It is held on May 5th to honor the Mexican victory over the French at the Battle of Puebla in 1862. The festival is a celebration of Mexican culture, and it includes music, dance, food, and other activities. The festival is open to everyone, and it is a great way to learn about Mexican culture.
Music saved my life states COM adjunct

By MICHELLE HILL

Music saved my life," said Kay Ka. College of the Mainland adjunct faculty member Ka. is considering a possible career in music therapy. "It was a way to express myself as a musician," was selected through a nationwide search as the Texas City Sun Citizen of the Year.

"I changed from music major at College of the Mainland to music therapy," said Ka. "I want to help others with music." Ka. was raised in Houston, freelance work, teaching voice privately and in the Fine Arts Building. (Photo by aerial Photography)

Memorials remind us of Texas City Disaster

By Jenn Cabreza

Fifty years ago, in the middle of the night, a tragic explosion of a petrochemical plant in Texas City killed 514 people. The devastating event left a lasting impact on the community and the world. To honor the memory of those who perished and to remind us of the importance of safety and preparedness, the Texas City Disaster exhibit was recently displayed in the library of the College of the Mainland.

The exhibit, which includes photographs, artifacts, and personal stories, provides a detailed account of the disaster and its aftermath. It features images of the destruction, interviews with survivors, and information about the ongoing efforts to prevent similar incidents.

Chaptar Day festivities April 3

The College of the Mainland Fine Arts Gallery will host a celebration of the spirit of the school on April 3 from 10 a.m. to 3 p.m. The event will feature art exhibits, musical performances, and other activities. The gallery is located in the Fine Arts Center of the College of the Mainland. For more information, visit the college's website.

Art depicts Ukraine's centuries-old history

The College of the Mainland Fine Arts Gallery will display an exhibition of Ukrainian art from April 4 to May 29. The exhibit includes works from artist Tatiana Yurkiv, who was born in Ukraine and now resides in Texas. Her paintings depict Ukrainian traditions, culture, and landscapes, providing a glimpse into the rich history of the region.

Cosmetics offers cutting-edge services

The College of the Mainland Cosmetology Lab is now offering cutting-edge services for students and faculty. The lab, located in the Cosmetology Building, is equipped with the latest technology and staffed by experienced instructors.

Bogus police officer reported on Tiki

A man claiming to be a police officer was reported on Tiki Island by a concerned citizen. The individual was seen soliciting money from passersby and was suspected of using a forged badge. The police department is investigating the incident.

Staffers win record number of awards

Continued from Page 1

"Where there's a will, there's a way," InterCOM's Managing Editor and Layout Artist Maree Doo said proudly on Thursday, May 1, 1997, when she accepted the award for the best newspaper front page of the year. Doo was one of the many InterCOM students who were honored for their work at the annual TIPA Awards ceremony held at the University of Houston-Clear Lake on Thursday. The InterCOM newspaper, which is published monthly, has won numerous awards for its editorial and design work in recent years. This year, the newspaper won a total of 23 awards, or 11 more than last year.

People Speak Out

By ELIZABETH RODRIGUEZ, Assistant Editor

My name is Manuel Rodriguez, and I'm a senior at the University of Houston-Clear Lake. I've been working on the InterCOM newspaper for the past two years, and I'm really proud of what we've accomplished. We've worked hard to improve the quality of our paper, and I think we've made great strides in recent years. I think our work is a reflection of the hard work and dedication of all the students who have contributed to InterCOM over the years.

Charter Day celebrates COM's 30th anniversary

By DEBORAH WILSON

The College of the Mainland Police Department recently celebrated the 30th anniversary of the College's Police Academy. The event was held at the College's central campus in Webster, Texas. The event included a ceremony, which was attended by College President Dr. Donald G. Bass, and members of the College's faculty and staff.

High schooler asks for peers’ tolerance

Michelle Hill

I want to say that I was wrong. I thought that maybe I was being tolerant when I was, in reality, just being stupid. For the benefit of those who don’t know, I am a senior in high school who is currently enrolled at COM. I know more high schoolers who are currently enrolled at COM. I know that I am not the only high school student who attends COM. I know that there are many more high school students who attend COM.

The second comment is not as bad as the first, but I guess you think you’re really smart!” or “I have no idea what you’re talking about.” These are examples of how people can react to others. I think these reactions are predictable.

When someone discovers my age, I don’t mean that I think I’m “oh, so smart” or I know more high schoolers who are currently enrolled at COM. I know more high schoolers who are currently enrolled at COM. I know that I am not the only high school student who attends COM. I know that there are many more high school students who attend COM.

Southwest Premiere
June 5-29 at COM
Back Flap

The Southwest Premiere of Eleemosynary is directed by Murray Getz, who is also the author of the production. The piece is a contemporary drama about a family facing financial hardship and the resulting stresses. The cast is supported by a talented ensemble, including Devon Moore and Niles Warren, who have both given memorable performances in previous productions at the COM Arena Theatre. The production is set to delight audiences with its engaging script and powerful performances.

Tour Alaska's wilds
via new IMAX film

At 8 p.m. the COM Arena Theatre staged a performance of Walk in the Wilderness, a film that takes viewers on a journey through the Alaskan wilderness. The film, produced and directed by Patricia Harrington, features stunning visuals and immersive sound, transporting audiences to the heart of the wilderness. The film is part of the IMAX 3D series, which offers a new level of detail and realism that is truly awe-inspiring.

Mexican university publishes
history professor's book

On the campus of the University of Guadalajara, a new book has been published by Dr. Patricia Sánchez, the university's history professor. The book, titled "The Copper Revolution," explores the history of the Mexican Revolution and its impact on the country. The book is a significant contribution to the understanding of Mexican history and is sure to be a valuable resource for students and scholars alike.

Early detection vital in breast cancer cure

By PATRICIA HILL

Breast cancer is the most common form of cancer in women, according to the National Cancer Institute. It is the second leading cause of cancer deaths, behind lung cancer, in women in the United States. In 1993, approximately 174,000 women were diagnosed with breast cancer. This article examines the early detection of breast cancer and prevention of this disease.

Breast cancer is most commonly diagnosed in women in their 50s and 60s. After age 65, however, the risk of developing breast cancer increases significantly. The most common symptom of breast cancer is a lump or thickening in the breast. Other symptoms include changes in the skin of the breast, such as dimpling or puckering, and changes in the nipple, such as discharge or inversion. These symptoms are often accompanied by tenderness or pain.

Early detection is crucial in the treatment of breast cancer. The earlier breast cancer is detected, the more likely it is to be cured. Regular self-examinations and mammograms are important in the early detection of breast cancer. Women should perform self-examinations monthly, and mammograms should be performed every 1-2 years, or more frequently if recommended by their doctor.

Breast cancer can be influenced by various factors, including genetics, hormones, lifestyle, and environment. Genetic factors, such as having a family history of breast cancer, can increase the risk of developing the disease. Hormonal factors, such as age, menopause, and the use of birth control pills, can also increase the risk of breast cancer. Lifestyle factors, such as smoking, obesity, and lack of physical activity, can also increase the risk of breast cancer. Environmental factors, such as exposure to certain chemicals and radiation, can also increase the risk of breast cancer.

In addition to early detection, prevention of breast cancer is also important. The American Cancer Society recommends that women avoid obesity, exercise regularly, and limit alcohol intake. They also recommend that women eat a healthy diet, rich in fruits and vegetables, and limit their intake of red meat and fat. Additionally, they recommend that women limit their exposure to chemicals and radiation, and avoid smoking.

Prevention and early detection are crucial in the treatment of breast cancer. Regular self-examinations and mammograms are important in the early detection of breast cancer. Lifestyle factors, such as exercise and diet, can also help prevent the development of breast cancer. By understanding the factors that increase the risk of breast cancer and taking steps to prevent its development, we can reduce the risk of developing this disease.

Preservation of vandalized table tops no picnic

By J. EDEN HAYS

The College of the Marinians Student Council is currently planning a picnic to take place on Saturday, April 27th, at the College of the Marinians. The picnic will be held on the picnic grounds, and is open to all students, faculty, and staff. The picnic will feature food, games, and live music. The Student Council is also planning a sale of merchandise, including T-shirts and hats, to raise funds for future events.

The picnic will be held from 12:00 noon to 3:00 pm, and is free to all. The College of the Marinians Student Council is looking for volunteers to help with the planning and execution of the picnic. If you are interested in volunteering, please contact the Student Council at 555-1234.
Illegal are also often subject to high-risk sex due to fear of rejection, the need for protection, or lack of other options. The medical community has also been working to find new ways to prevent the spread of the disease, such as developing vaccines and improving access to treatment.

In conclusion, HIV/AIDS is a complex disease that affects many aspects of life. It is important to continue to educate the public about the disease and to provide resources for those affected. With continued research and development of new treatments, we can work towards finding a cure for HIV/AIDS and improving the lives of those affected by the disease.
InterCOM Production

The Beginning

As a student, the newspaper is a family business. Members choose to remain with the InterCOM staff for the fun and challenge of working together to create a publication that everyone can be proud of. The InterCOM staff is hardworking and has the ability to create a finished product.

Each activity is unique and gives each person a chance to try something new. Whether writing an article or editing a page, the InterCOM production team can make each person feel important.

The End

After a week of production and a month of planning, the InterCOM staff is put to bed. The flats, photographs and any other elements are taped to a newspaper, which is then printed and taken to the printer. The InterCOM staff is then able to enjoy the finished product.

The first step in producing the InterCOM newspaper is the writing of a list, which is placed on a whiteboard. This list is completed and cropped as necessary to fit in to the position it is given. The cutline gives the who, what, when, where and why of the photograph and the event.

To design the layout of the newspaper, a "dummy" or mock-up is created. This includes all the type to be placed onto the page. The typesetter takes care of the blueprint type grid.

Each article is measured and given an inch count. These measurements are used by the typographer to determine where the story will roll in the InterCOM. The first draft of the InterCOM front page is created by the typesetter. The End

Early detection vital in breast cancer cure

By MARCE

By having their pocketbooks put on the line, women today are more willing to get regular checkups to detect cancer is imperative, according to the National Cancer Institute. In 1975, only 3 out of 10 breast cancer cases were caught in the early stages. In 1985, one in five women had already developed breast cancer.

While statistics show that early detection is the key to recovery, the risk of breast cancer is real for every woman. It is not something that one would and should not expect to find in a woman of any age. Breast cancer is one of the most common forms of cancer in women, accounting for nearly 10 percent of all cancers affecting women. Although breast cancer is primarily a disease of women, it also affects men.

The tumors may be malignant or benign. The tumors may be malignant or benign. Malignant tumors can develop in the breast tissue, in the ducts that carry milk from the breasts to the nipple, and in the lobes or lobules, which are the small glands that make milk. Benign tumors are not cancerous. They may be located in the breast tissue or in the ducts and may develop in the breast. Some cancers may begin as benign tumors and then develop into cancer.

In the United States, breast cancer is the most common cancer affecting women. It is the second leading cause of death from cancer in women. Breast cancer is diagnosed in approximately 170,000 women in the United States each year and more than 17,000 women will die of breast cancer. Each year, more women are diagnosed with breast cancer than ever before. This is due to better detection, earlier diagnosis, and improved treatment. In 1975, one in five women had already developed breast cancer. In 1985, one in five women had already developed breast cancer.

The College of the Mainland's Student Activities Program is a non-profit organization dedicated to providing a wide range of activities for students on campus. The program is open to all students and is funded through the Student Activities Fee. The Student Activities Fee is a mandatory fee that all students must pay in order to attend the College of the Mainland.

The Student Activities Program offers a variety of activities, including concerts, guest lectures, and film screenings. The program also sponsors a variety of clubs and organizations, including a debate team, a drama club, and a student government association.

The Student Activities Program is managed by a team of volunteers, including a President, Vice President, Secretary, and Treasurer. The team is responsible for planning and executing all events and activities. The team is also responsible for raising funds to support the program.

The Student Activities Program is supported by the College of the Mainland. The College of the Mainland is a public institution located in Texas. The College of the Mainland offers a wide range of programs and services, including undergraduate and graduate degree programs, continuing education programs, and community services.

The College of the Mainland is committed to supporting the Student Activities Program. The College of the Mainland provides funding for the program and also offers resources and support to the team.

The Student Activities Program is a vital resource for students at the College of the Mainland. The program provides a wide range of opportunities for students to participate in extracurricular activities and to develop leadership skills.
COM Art Festival draws crowds

BY ROBERT W. KOWAL

Staff Reporter

The Landbridge was formed at the Bering Strait when sea levels fell. They have made it possible for people to live there. It has been populated for thousands of years by people who have migrated north from Asia. Today, many people are living there because it is a beautiful place. The land is very fertile, and it is easy to grow food. The climate is mild, and the weather is pleasant. However, the living conditions are harsh. There are no roads, and it is difficult to get around. The people who live there use dogs to pull their sleds, and they have to be careful of the wildlife. The landbridge has allowed people to live in a place where they can have a good quality of life. It has been a place that has been visited by many people over the years.
High schooler asks for peers’ tolerance

Michelle Hill

I am a part-time student at College of the Mainland; also a senior at Texas City High School. I love school. I believe that getting an education is a right that should be available to everyone. However, just because I am a high school student does not mean that I think I’m “oh, so smart” or more right to be here than I have been at COM for the past two years. This small age difference does not give them any right to look down on me. At COM I want to get a head start on my future. It also helps the hunters, but benefit the wildlife most of all. The main reason I am at COM is to get a taste of college before I go to college doesn’t mean that I think I’m “oh, so smart” or more right to be here than I have been at COM for the past two years. InterCOM reader says editorial full of baloney

Gail Bryan

We don’t want to go off on a tangent, but we are a bit disappointed in the InterCOM editorials. We have been a part of this college for the past 30 years, and we feel that the editorial section is not reflecting the spirit of our college. It seems that the editorials are more focused on personal opinions rather than providing a balanced view of issues affecting our campus.

Campus crime reported

Continued from Page 1

Police are investigating a possible match of a fire to a car on the Texas City campus. According to Clifton, stolen items are things easily visible to anyone who might be able to spot them. However, other students have reported that they were not able to see the car when it was stolen.
